

Immunization Data Now Flowing

The Kentucky Health Information Exchange, KHIE, is happy to announce that all new Immunization messages are live and flowing through to the Immunization Registry.

What that means for you is if you are currently live with KHIE on the Immunization Registry, all of your new immunizations are flowing directly to the Kentucky Immunization Registry.

Some data from August 1, 2018 through Dec 10, 2018 is still being loaded into the registry and will be completed by the end of January 2019.

If you have any questions, please reach out to your KHIE Outreach Coordinator.
